“New Electra” Bean

A Fine New Wax Bean
 A Mammoth Pod—
 An Enormous
 Yielder.

THE most remarkable bean discovered in years. We have given it a rigid test in every form for the past three seasons. For a main crop bean it cannot be surpassed; its rapid developing merits, together with its phenomenal vigor and productiveness, insures it a money maker for any grower. The plants are of the strong, sturdy species, bearing in almost unlimited quantities, the most beautiful long round pods imaginable. The foliage of the bush being so as to protect the fruits from the burning sun's rays, hence avoiding all blight and rust usually encountered by the gardener. Price: Pkt., 5c; ½ pt., 10c; pt., 20c; qt., 30c; gal., \$1.00; pk., \$1.75; bu., \$6.00.

Don't Be Afraid To plant these leading varieties listed on Pages 1 to 9.

New White Wax Bush Bean

WE, in offering this new Wax Bean, know that it will fill a vacancy that no other bean will do. That is one that has all the good points and none of the bad ones. This market has been using all green podded varieties, because the older wax sorts soon become spotted after picking, and were never of high quality.

This variety is exceedingly handsome and very desirable, especially for the home garden. Vine dwarf, spreading and very productive. Pods are long, slightly curved, light yellow, wax-like, stringless and of the best quality. They are uniformly perfect, an ill-shaped one being rarely seen. Seed long, cylindrical, nearly white with a little dark marking about the eye. Price: Pkt., 10c; ½ pt., 15c; pt., 25c; qt., 40c; gal., \$1.00; pk., \$1.75; bu., \$6.00.

Fordhook Bush Lima Bean

Both pods and beans are twice the size of Kumerle or Dreer's Bush Lima, and more than half again as large as the Challenger Pole Lima. Is of stiff erect habit, branching freely but with all the braches held upright. Like Burpee's Bush Lima, the stalks that produce the blossoms are thrown out from the lateral and main stalks; the pods are borne in "clusters" of from four to eight. The pods resemble those of the Kumerle (Dreer's) Bush Lima, but average more than double the size.

It is the heaviest yielder of all the large size Bush Limas and is sure to take the place of Burpee Bush Lima as well as Henderson's Bush Lima. Price: Pkt., 10c; ½ pt., 15c; pt., 20c; qt., 40c; gal., \$1.25; pk., \$2.50.

We aim to have
only the Best. The
Best is what you
should plant.

Our New White Cornfield Pole Bean

IN this new Pole Bean we have one that far surpasses anything on the market. We have not had surplus stock to offer to all before, but have only a limited supply this season. This Bean is a cross between our regular White Cornfield and Kentucky Wonder; it is a fine long pod, round, thick and meaty green pod, with a white bean. It is a much heavier bean and far better shape than others, and will continue to bear far longer. We are the only ones who can offer you this new bean, and we are sure you will be highly pleased with the results.

Price: Pkt., 10c; ½ pt., 15c; pt., 25c; qt., 40c; gal., \$1.00; pk., \$1.75; bu., \$7.00.

Pole Lima Nichol's Genuine Butter Bean

We offered these old-time favorites for the first time a few seasons ago, and the demand has since grown phenomenal. Remember, it is the original old-time Butter Bean so much sought after by our parents and grandparents years ago. Vines grow very vigorously and are laden with mammoth wide pods, containing from 3 to 5 beans each. They are the genuine old-time Butter Bean. Price: Pkt., 5c; ½ pt., 15c; pt., 25c; qt., 40c; gal., \$1.25; pk., \$2.00; bu., \$7.00.

New White Cornfield

St. L. S. Co.'s New Crosby's Egyptian Beet

American grown. This famous strain of our own production is undoubtedly, without an exception, one of the finest, as well as one of the earliest beets ever grown, its shape and color being superb. **Our Business Grows
 because
 Our Seeds Grow**

New Early Ever- green Sweet Corn

Ready for table with the second earlies, such as Crosby's Early, Shaker's Early, etc., but is fully twice as large as any of them. The ears carry an average of 16 rows of fine large, deep, white and very sweet grains, which are second to none in tenderness and flavor. The stalk is very strong, sturdy and of only medium height; the leaves broad and dark green in color, a habit of growth which gives it great endurance during a dry time. Especially adapted for early trucking; also very desirable for the home garden. Pkt., 5c; pt., 15c; qt., 25c; ½ pk., 50c; pk., \$1.00; bu., \$3.75.

Golden Bantam Sweet Corn

One of the Sweetest Corns Grown

Golden Bantam is a dwarf-growing early variety. The plant attains a height of only 3 or 4 feet, usually bearing two or more ears about 5 inches long to a stalk. These little fat ears are compactly filled with kernels, which, when ready for the table are cream-yellow, so lusciously sweet, tender and milky that some people claim it "the sweetest corn on earth." Golden Bantam is one of the hardiest corns grown, therefore can be planted earlier with safety than other varieties.

Price: Pkt., 10c; ½ pt., 15c; pt., 25c; qt., 40c; gal., \$1.25; pk., \$1.75; bu., \$6.00.

New Early Cabbage, Copenhagen Market

This superb new Cabbage is undoubtedly without a rival as the **finest large round-headed early** Cabbage in cultivation. The type is thoroughly fixed, the heads maturing all at the same time—(this being a great consideration to Market Gardeners, entailing less labor in harvesting the crop and allows the ground to be cleared at the first cutting). The heads average about eight pounds each in weight, are very solid, with small core and of fine quality. It matures as early as **Charleston Wakefield**, and will give a much heavier yield per acre than that popular variety. The plant is short-stemmed, the heads being produced almost on the ground level. The leaves are light green, rather small, saucer-shaped, and always tightly folded.

Price: Pkt., 10c; ½ oz., 40c; oz., 75c; ¼ lb., \$2.75.

St. Louis Cannon Ball Cabbage

A GRAND LATE VARIETY

A new Fall Cabbage well worthy of your attention. Heads nearly round and hard as rock; fine ribbed white and tender; an excellent variety for kraut and winter use. Will produce more pounds to the acre than any other variety. Price: Pkt., 10c; ½ oz., 20c; oz., 35c; ¼ lb., \$1.25; lb., \$5.00.

“American King” Cabbage

SUCCEEDS WHERE ALL OTHER VARIETIES FAIL. THE BEST KEEPER.
THE LARGEST HEADED. THE FINEST QUALITY.

THIS IS THE CABBAGE THAT HAS MADE MORE MONEY FOR GARDENERS THAN ANY OTHER VARIETY EVER DISCOVERED.

Introduced by us in 1904, it has met with universal praise everywhere. Mammoth solid heads, weighing from 25 to 30 pounds are common sights in a field of this wonderful late Cabbage. We could not offer you anything better if we had the world's entire output of cabbage to select from. Its chief points of merit are in absolute reliability as a sure cropper, its uniformly large size of head, its great drought and worm-proof qualities. A very prominent and distinct feature of the **AMERICAN KING** has a small number of ribs and their remarkable smallness in size. This stamps it of the highest quality. Price: Pkt., 10c; ½ oz., 20c; oz., 35c; ¼ lb., \$1.25; lb., \$5.00.

Great International Cucumber

The Largest, the Handsomest, the Finest

We now offer the perfect Cucumber in our "International," an extra early specie of a most remarkable quality and appearance. Its unique shape and handsome color predict for it a vegetable of immense popularity, its color being of a drak green slightly ridged. It is enormously prolific and a continuous producer. For slicing it is superb, its symmetrical fruits are uniformly large. The flesh is very solid, fine grained. The vines are vigorous and mildew-proof; in fact, for general use we unhesitatingly recommend it superior to any other variety. Price: Pkt., 5c; ½ oz., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00.

Pride of Denmark Cauliflower

The Earliest Forcing Variety in Existence

This is the great new Cauliflower that we introduced two seasons ago.

We challenge the world to produce the equal of this new white Cauliflower wonder. It is the finest, the handsomest and the earliest Cauliflower in the world, as well as the largest species ever discovered. It is gorgeous beyond description. Its color is snow white, and its growth is of the most compact form. For an outdoor variety it cannot be surpassed. You who have been planting the Dwarf Erfurt and Snowball varieties should give this new introduction a trial this season. It has been thoroughly tested in this locality and is a sure cropper. Price: Pkt., 25c; ¼ oz., \$1.15; ½ oz., \$2.00; oz., \$4.00.

Frankfort Carrot

HERE IT IS AT LAST. THE FINEST HALF LONG STUMP ROOTED CARROT EVER OFFERED. IT IS THE BEST COLORED AND SMOOTHEST SHAPED CARROT IN EXISTENCE.

A very choice strain. Tender, fine-grained flesh. An enormous producer; handsome, uniform stumped roots. Considered by many to be the best table Carrot, because of its quality and shape; free from core and of a deep golden yellow color. We have only a small quantity of seed to offer this season, therefore we will not sell more than one pound to a customer as we want you to try it. Carrots are all very short crop this last year, which makes prices higher than usual. Price: Pkt., 10c; ½ oz., 15c; oz., 30c; ¼ lb., 90c; lb., \$3.00.

Frankfort Carrot

King of the Garden Lettuce

A FINE HEAD VARIETY

A fine variety for outdoor planting or for cold frames either for market or home use. It produces extra large heads, very compact, of a fine flavor. Our market gardeners should not fail to plant freely of it. Price: Pkt., 5c; ½ oz., 10c; 1 oz., 15c; ¼ lb., 50c; lb., \$1.50.

Crimson King Pepper

A Very Heavy Cropper, the best mango on the market today.

Habit of growth robust and stocky with no tendency to grow an immense plant with little or no fruit. The fruit is not quite as large as Chinese Giant; in shape not quite so blocky. (See illustration.) In weight is much heavier than a Ruby King of same size. In flavor it is the mildest we have ever known, as the flesh may be eaten raw from the hand. Growers will have no difficulty in selling all they can grow, customers preferring it to all others for making mangoes. Our seed is saved from most perfect type. Price: Pkt., 10c; ½ oz., 25c; oz., 50c; ¼ lb., \$1.75.

Sparkler White Tipped Radish

This variety leads all others, very attractive and a sure seller

This quite distinct variety fulfills every requirement in each respect, the color being a rich carmine scarlet with a very pronounced tip of the purest white. The roots even when fully developed are solid, crisp and sweet, and remain fit for use as long as the coarser kinds. It is equally well adapted for forcing in frames or growing in the open ground, for while the leaves are small, they are sufficiently large for bunching.

White tipped radishes are justly popular by reason of their attractive appearance, but the varieties already in existence are either too dull in the ground color or lack a clearly defined white tip.

Mushroom Culture (Champignon-Brut)

MAY be grown in a great variety of situations—a dark room, cellar, stable or elsewhere. Any place in which an even temperature of about 50 or 60 degrees can be kept, is suitable. For materials for the bed, use fresh horse manure, free from straw or chips, and good loamy soil. Some growers use the manure unmixed with loam, after first having well fermented it by alternately piling up and mixing for a few weeks; but it is undoubtedly better not to allow the manure to heat much before forming the bed. Use one-fourth to one-third loam, the rest manure. Mix very thoroughly and upon a dry, firm bottom; make the bed of this mixture about four feet wide, and of any desired length. Build it up evenly, pressing it down very firmly, and leave it about a foot high. It will shortly begin to heat. Use a thermometer to thrust into bed, and note the temperature. When the heat has partially subsided, leaving a temperature of 70 to 80 degrees, put in the spawn. Pieces from the size of walnuts to that of eggs are placed in the bed about a foot apart, deep enough to cover them well, and the manure pressed down. Let it remain thus ten or twelve days; then cover with two inches of fresh loam, and make this moderately firm.

The bed is finished by covering all with 4 or 5 inches of fresh loam, and make this moderately firm. Inches of straw or other litter. Watering is not necessary, unless the surface of the bed gets very dry; in this event, moisten freely with water at a temperature of about 80 degrees. In gathering the crop, do not cut, but twist them off carefully, filling up the holes with loam to keep insects from the roots. In six or eight weeks from spawning the beds, mushrooms should appear.

GENUINE ENGLISH MILLTRACK SPAWN—Large brick, 20c; five bricks, \$1.00; 100 lb., \$10.00. One pound English Spawn will spawn about 6 square feet.

Hardy Perennial Plants

The demand for hardy perennial plants has been increasing, and today more of this class of flowers are planted than in the past five years collectively. When once planted they are a source of constant pleasure succeeding years.

Gladioli

Rare and Choice Varieties

Most people, when you speak of Gladioli, think of the old-fashioned red and yellow flower common a generation ago, and have no idea of the immense improvement that has taken place in them. Every color of the rainbow is now represented, and in form and color and size no lily or canna can equal them. Some of mine are 6 inches across and of the most wonderful and beautiful coloring imaginable.

America

Moon Flower

New Sweet Peas A Grand Orchid Flowering Countess Spencer Type

They are quite distinct from the standard sorts, having large, round, open flowers of extraordinary size, usually measuring two inches across, with wavy standards and wide-spreading wings, a very large percentage bearing four of these immense blossoms to the stem, which is long and strong, making them of exceptional value for cutting.

Apple Blossom Spencer The petals are waved and crinkled to a remarkable degree. Like the original **Apple Blossom**, some flowers are deeper in color than others on the same vine, but all are most attractive and bunch well. The vigorous vines are fairly loaded with the large handsome flowers. Price: Pkt., 10c; oz., 20c; ¼ lb., 60c.

Asta Ohn Spencer The flowers are of large size, pronouncedly fluted in the standard, with unusually large, thoroughly waved wings. The stems are particularly long and sturdy and each stem uniformly bears four flowers. The color is a **charming soft lavender**, suffused with mauve. Price: Pkt., 10c; oz., 20c; ¼ lb., 60c.

White Spencer Produces in the greatest profusion pure white flowers of large size. It is white-seeded and the flowers—of the Spencer type—extremely beautiful. The bold standard is crinkled and fluted; the wavy wings are so folded that the keel is almost hidden. They are almost completely covered with bloom. Price: Pkt., 10c; oz., 20c; ¼ lb., 60c.

King Edward Spencer The standard measures from one and three-quarters to two inches across by one and one-quarter inches deep. The unusually large wings make the flowers appear **truly gigantic in size**. The standard is a deep rich carmine-scarlet of glossy effect. The wings are also carmine-scarlet and on the reverse side are of a deep rosy carmine. Price: Pkt., 10c; oz., 20c; ¼ lb., 60c.

Mrs. Joseph Chamberlain Spencer A beautiful silvery white, striped with rosy pink, making a very gorgeous effect. Price: Pkt., 10c; oz., 20c; ¼ lb., 70c.

Mrs. Walter Wright Spencer The flowers are self-colored, of a pinkish-cream tint when first opening, changing to mauve and then to a reddish violet. A very handsome and effective, one of the best varieties. Price: Pkt., 10c; oz., 20c; ¼ lb., 70c.

Othello Spencer This beautiful new Sweet Pea is decidedly the best of all dark Spencers—far superior to the English **Black Knight Spencer**. The flowers are beautifully waved or crinkled both in standard and wings. The long stems are thick and carry well either three or four, fine blooms of a **rich deep maroon**. It is a strong grower and flowers most profusely. Price: Pkt., 10c; oz., 20c; ¼ lb., 70c.

Phenomenal Spencer Very large flower of hooded and wavy form. The lower blossom on the stem is often double. The color is white, suffused with rosy lavender, which grows deeper toward the edges. Price: Pkt., 10c; oz., 15c; ¼ lb., 40c.

Prince of Wales Spencer (Marie Corelli). A brilliant rosy-red of exceptional large size. Price: Pkt., 10c; oz., 20c; ¼ lb., 70c.

Beatrice Spencer The flower is fully as large as **Countess Spencer**, deeper in color, with grand wavy standard and large wings. Blanche Ferry Spencer The popular pink and white; always reliable; fine cut flower variety. Price: Pkt., 10c; oz., 20c; ¼ lb., 70c.

Countess Spencer The coloring is a soft rose-pink, which deepens at the outer edges and becomes still richer or more heavily suffused in cool weather. In size, form and coloring, **COUNTESS SPENCER** is simply exquisite. The plant is a strong vigorous grower, and the large flowers are borne three and four upon long stiff stems. Price: Pkt., 10c; oz., 15c; ¼ lb., 45c.

Helen Lewis Spencer This superb variety received the Certificate of the National Sweet Pea Society of England. It is a grand gigantic orchid-flowered seedling of **Countess Spencer**. The orange-rose wings roll and fold; the standard is reflexed, showing the distinctly fluted effect, and is of an intense rich crimson orange. Price: Pkt., 10c; oz., 20c; ¼ lb., 50c.

Aurora Spencer This is an exact counterpart as to color of **Burpee's Aurora Sweet Pea**. The superbly beautiful flowers are of really enormous size; they are produced most profusely in threes and fours, well placed on the end of long, stiff, dark-green stems. The ground color is a cream-white, and this is exquisitely flaked and mottled with rich orange-salmon. Price: Pkt., 10c; oz., 20c; ¼ lb., 70c.

Henry Eckford

The flowers are self-colored in a bright **soft flaming orange**, deepening slightly in the center. To secure the finest color effect the flowers should be cut as soon as opened and allowed to develop in water in a cool room, as they will fade under the hot sunshine; or an even better plan is to cover the blooming plants with cheese cloth. Price: Pkt., 5c; oz., 10c; ¼ lb., 25c.

Florists' Lavender

Flowers very large, well formed and of a beautiful shade. The long, stiff stems make it a leader for cut flowers. Vines are of vigorous and robust growth. Price: Pkt., 5c; oz., 10c; ¼ lb., 25c.

Flowers of large size, beautifully formed and widely spreading, with the wavy or crinkled effect so much admired. Both standard and wings are a clear pink color which is suffused over the entire flower, but rather deeper and heavier at the outer edges. Price: Pkt., 5c; oz., 10c; ¼ lb., 25c.

Helen Pierce

The color is very bright blue, mottled on pure white. It does not show any suggestion of stripe but is uniformly marbled or mottled. Of good size and perfect shell shape. Per pkt., 5c; oz., 10c; ¼ lb., 25c.

Lawn Grasses

“If You Want a LAWN that is a LAWN Sow HAVALAWN”

Our Famous HAVALAWN GRASS SEED Awarded the
 L. P. Exposition Medal 1904

Havalawn

(Name registered in U. S. Patent Office.)

Is procurable only from us. Every package bears our green label. No other is genuine, and we will prosecute all infringements.

Havalawn Mixture

Will insure a beautiful, compact evergreen sod on any lawn where the essential requirements of grass culture have been complied with. Its component parts are the grasses particularly adapted to lawns and door yards. It is composed of the best thriving varieties, together with the best known creeping or sod-forming sorts. Timothy and orchard grass are wholly excluded on account of their coarse leaves, and only finest sorts are used. Full provision is made for a succession of growth, so that there shall be no break in the richness of the verdure from spring until autumn, and experience proves that Havalawn Grass Mixture is now perfect. Nothing better can be purchased on the American market, no matter what claims may be advanced by other seedsmen. Price: Per lb., 35c; half bu. (7 lbs.), \$2.25; bu. (14 lbs.), \$4.50.

St. L. S. Co.'s

Shady Lawn Mixture

This mixture is intended for all situations that are in partial or complete shade, and will be found invaluable on grounds lying under the shadows of trees or buildings. In preparing such places for the reception of grass seeds it is well to use air-slaked lime quite liberally. This mixture is a combination of fine dwarf-growing, evergreen varieties of grass, which grow naturally in the woods or in shaded spots. They are mixed in proper proportions to make a fine lawn under shade trees. Sow seed thickly. Price: Per lb., 35c; half bu. (7 lbs.), \$2.25; bu. (14 lbs.), \$4.50.

Lawn Grass—Continued

ALL GRASS SEED PRICES ARE SUBJECT TO MARKET CHANGES

Good Result Mixture

This is intended for back yards, large playgrounds, etc., that are not intended to be kept cut as closely as other front lawns, and where grass is wanted quick to cover unsightly places; also for tenants who do not intend to stay long on the premises, yet want a good grass. We would advise setting the lawn mower as high as it will go in cutting this grass, and not water often, but when you do, do it in earnest, or else keep the water off. This rule should apply to all lawn grasses. Watering often burns out the grass more than you may think. The grass mixture will give value received for your time and money spent and will enable those who don't want to spend much on the lawn a chance to have plenty of green grass.

We are anxious to see every city lot covered with grass, instead of being covered with rubbish, tin cans, brush, ashes, etc. We make this mixture so it is within the reach of all. No excuse now for not having a lawn, if price has interfered before. Price: Lb., 25c; half bu. (7 lbs.), \$1.60; bu. (14 lbs.), \$3.00.

Fancy Kentucky Blue Grass

So widely advertised as an ideal lawn grass, it has merits and demerits. Where Blue Grass thrives it eventually makes a good lawn, but it is slow to thicken up, requiring not less than two years to form a good sward, and does not hold its color in hot weather; it will not thrive on acid soils, and a large proportion of soils in the lower altitudes, especially in the Coast States, are inclined to acidity. Kentucky Blue Grass is quite extensively used for lawns on the Pacific Coast and on the limestone soils of Kentucky, etc., but

the results of this or any one grass in no way compare with the beauty and fine velvety texture of lawns made with an intelligently blended mixture of grasses of neat, close, interweaving growth, such as compose the "Havalawn" Lawn Grass mixture; and besides, the latter will make a thick, close turf in a few weeks' time. Price: Lb., 35c; half bu. (7 lbs.), \$2.25; bu. (14 lbs.), \$4.50.

White Clover

Valuable for the lawn with other grasses; helps to shade same and keep the soil from washing out. Price: Per lb., 50c.

Formation of Lawns to be Sown

The ground should be thoroughly drained and well prepared. The soil ought not to be too rich, as a rapid growth is not wanted in the grasses of a lawn; but the surface should be as much alike in quality as possible and thoroughly pulverized. After sowing, the ground should be rolled in order to press the seed firmly into the soil. The proper time to sow grass seed depends, of course, upon the latitude. In this vicinity from early spring to hot weather. Seed may also be sown in the fall, provided it is done early enough to secure a good, strong growth before winter sets in. The sowing should be done when the ground is moist, or before an expected rain, and a subsequent rolling is always advisable. As to weeds in newly made lawns, it may not be generally known, but many weed seeds actually lie dormant in the ground for six or seven years and will germinate and make their appearance when the soil is turned up. It requires at least 1 lb. of seed to every 200 square feet of ground, not already seeded, to give best results.

Rolling—As soon as the frost is out of the ground in the spring, the land should be gone over with a heavy roller. Winter frosts loosen

the soil, and rolling is necessary to compress it again. If grass seed is to be sown, this should be done first and the rolling immediately afterward.

Roll frequently.

Mowing—All turf-forming grasses are improved, both in vigor of root-growth and in fineness of texture by frequent mowings. It is impossible to say just how often the grass should be mown, as that depends upon the rate at which it grows. Too close cutting should be guarded against, however, especially during the hot summer months, when the roots require some top growth to protect them from the burning sun. A good top growth is also necessary to protect the roots from severe winter frosts.

To Grass a Bank or Terrace—For each square rod, take a pound of lawn-grass seed, and mix it thoroughly with 6 cubic feet of good, dry garden loam; place in a tub, and add liquid manure, diluted with about two-thirds of water, so as to bring the whole to the consistency of mortar. The slope must be made perfectly smooth, and then well watered, after which the paste should be applied.

Fertilizers

For Lawn, Garden, Field and House Plants

A NECESSITY TO ALL GROWING PLANTS

The farms of our land were never in such need of fertilizing as they are today. The Government Experiment Stations have proven that with the use of fertilizer you can raise much larger and finer crops, and without drawing on the land for all its nutriment. Report shows that the Western States are "waking up" and that there has been from 500 to 1000 per cent more increase in different States in the past year in the use of fertilizers. Eastern farmers never think of sowing wheat and grasses without sowing fertilizer also, and our Western customers will soon do the same. The proper time to fertilize in St. Louis latitude is September for fall sowing and March for spring sowing.

Here is a Fertilizer that will satisfy those who are skeptical as to the use of Commercial Fertilizers—

- First—Because seeing is believing.
- Second—Because you can see what it is.
- Third—Because it adds humus to the soil.
- Fourth—Because it nourishes plant life.
- Fifth—Because it is pure; contains no weed seeds.
- Sixth—Because it is easily applied, without endangering the plants in the least.

All these points are combined in our brands of Pure Shredded Cattle Manure, Pulverized Hog Manure and Pulverized Sheep Manure.

Pulverized Sheep Manure

As a top dressing for lawns there is nothing better. Promotes a steady and rapid growth in the vegetable garden. For garden and field crops. 1 to 2 tons per acre, one-half before plowing, balance before harrowing. For top dressing use 1 ton per acre—fall or early spring. Price: 5 lbs., 20c; 10 lbs., 35c; 25 lbs., 75c; 50 lbs., \$1.15; 100 lbs., \$2.00; 500 lbs., at \$1.75, delivered in this city.

Pulverized Hog Manure

Is without any doubt one of the most powerful fertilizers. It is especially adapted for garden use, as well as for all grain crops. Potatoes will pay big where this is used. It is prepared in such shape it can be drilled with any farm seed drill. It is free from all foul seeds and always ready to use. Why should you raise crops that fail to yield, because you could not get the kind of fertilizers you needed heretofore? But you can't say that now. The above three fertilizers are pure, and if you figure what it costs you to haul stable manure from the city you will find you can buy the above brands much cheaper and have all you want for your crops.

Ask us, when in our store (or come in and see us) about these, and look at samples and see for yourself. Try it and be convinced, as we are. Price: 100 lbs., \$2.00; ton and carload lots at special quotations.

PURE BONE MEAL—Price: 5 lbs., 20c; 10 lbs., 35c; 25 lbs., 65c; 50 lbs., \$1.25; 100 lbs., \$2.00.

Shredded Cattle Manure

This is a high grade of Fertilizer that will fill a long-felt want, and prepared in such shape to be easily applied by any man or boy. This, added to our Pulverized Sheep Manure, on lawns will make grass grow on most any soil. It has been tested thoroughly and found to contain just what we are all wanting. It is being used on a large scale among gardeners and farmers on all crops and they find it cheaper and better than any compost they can haul from city or barnyard on the farm. They never can get enough at the latter places. This new form will enable them to have plenty on hand to use at any time they need it. We know of gardeners buying carloads of it and our Hog Manure. A hint to the wise is sufficient. Price: 100 lbs., \$2.00; 500 lbs., at \$1.75, delivered in city. Ton and car lots at special quotations.

 EVER DISCOVERED

OUR STOCK OF POTATOES ARE SHORT, OWING TO HAVING ALL GROWN IN ONE SECTION FROZEN

New Irish Cobbler

A FINE EARLY WHITE POTATO

This has become one of the general favorites in all localities for early as well as late planting. When it was first sent out it was not claimed to be particularly early, but extensive growing in this locality proves that it is fully as early as Queen or Hebron. The yield at digging both before the potatoes are ripe, and after maturity, is very large and far superior to many of the high-priced "novelties," besides nearly all ordinary sorts in general use. The particular feature which impresses our many growers are the general thriftiness of the vines, combined with a remarkably large yield of fine, large, most attractive, pure, white-skinned potatoes. The tubers are round in shape, eyes somewhat deep, and tubers of both fine appearance and quality. There is a heavy demand for Irish Cobbler potatoes from all sections. Price: ½ pk., 30c; pk., 60c; bu., \$2.00.

Big Buster

The finest late Potato in existence. Its make-up is of the most handsome type and as a main crop it will prove itself supreme. It is of large size, white skin, eyes shallow, very white inside, dry and mealy. Its yielding qualities are far ahead of any on the market today. Why people will plant old worn-out varieties, when they can get such new ones as these, is a mystery to us. We have only a limited supply this season. Price: ½ pk., 35c; pk., 65c; bu., \$2.25.

New Early "Dix" Potato

The ride of the "Red River Valley." We offer it to you now as "The Greatest Potato on Earth." We mean just what we say. We are ready to stake our reputation that you will say so too, when you have tried it. It is of the most uniform growth ever known—all large, no small potatoes being found. It is earlier than the famous Early Ohio. It is ten times better as a yielder, and has no yellow or black core. Its tops are of an upright growth, bush form. Its skin is of a light red pinkish color; its eyes are very shallow, and many; its dry and mealy nature is supreme. Price: ½ pk., 50c; pk., 90c; bu., \$3.00.

New Irish Cobbler

NEW IMPROVED PEACH-BLOW—The potatoes are of a very uniform size, none growing so small but that they can be readily used. It is of a beautiful type, producing large, white, smooth potatoes, with handsome, shallow pink eyes, giving them a very appetizing appearance when on the market. It is an excellent keeper. Price: $\frac{1}{2}$ pk., 35c; pk., 65c; bu., \$2.25.

SNOW FLAKE—The tubers are of a good medium and uniform size, elongated oval, compressed, exceedingly symmetrical and remarkable uniform. Its mealiness, its pure, delicate flavor, and the evenness with which it cooks through, have never been eclipsed by any potato. Pk., 65c; bu., \$2.25.

EARLY OHIO—Northern grown in the Red River Valley. Much need not be said of this great potato. Among the standard early varieties it undoubtedly stands at the head of the list. An excellent keeper for such an early variety. Price: Pk., 50c; bu., \$1.75.

“Velvetlawn” Seeders

MAKE PERFECT LAWNS AND GREENS

The illustration is a front view of the “Velvetlawn” Seeder. The ground wheels drive the feeds by means of sprocket wheels and chain. The feed dial on the front of the hopper has a number of nocthes in it into which fits the shifting lever. The shifting lever locks in the notches and enables the operator to sow in wide range of quantities. This lever can also be shifted to close the feeds entirely.

There are eight single discs on the machine, set two inches apart. Therefore it plants eight rows of seed at a time, or a strip sixteen inches wide. There are as many force feeds on the “Velvetlawn” Seeder as there are discs. Every feed sows an equal amount of seed, and the feeds can be set to sow any quantity desired. Each disc is independent in action and automatically conforms to the inequalities of the ground. Each disc has an independent roller which presses the soil back, covering the seed, allowing for uneven grounds.

It does equally as good on old lawns as it does on new. Every seed trench contains an equal amount of seed. No seed is wasted. The seed must grow, because it is in the soil and not on top of it. The wind cannot blow it away. Birds and fowls do not get it. Neither can heavy rains wash it away. The discs do not tear the sod; they cut it, cultivate the grass roots and make a finely prepared seed bed. For work in gardens and new grading the discs pulverize the soil. Send for catalog. Each, **\$15.00.**

“Velvetlawn” Horse Seeder

This machine is same style as in above cut, only it sows a strip four feet wide, with all shifting devices, etc. It is used in making over old lawns, parks, and large estates, as well as making a new lawn. Same is complete with shafts ready to hitch to and guaranteed to do fine work. Circular on request. Price, **\$45.00.**

“Velvetlawn” Broadcast Seeder or Fertilizer Sower

This machine is same size as one at top of page, except it does not have the discs and sows seed on top of ground as in cut at left. It is inexpensive and does the work far better and more even than by hand. Price, **\$6.00.**

“Velvetlawn” Fertilizer Sower

(See cut.)

You can use lawn fertilizers such as pulverized sheep manure, pulverized hog manure, bone meal, etc., without any disagreeable odor around the house. There is none of it wasted by blowing away. We are proud to be able to offer our customers such a valuable machine, and we guarantee it in every particular. It saves time and money, and the work is done right. Price: Each, **\$6.00.**

Fancy Gold Fish

Common Gold Fish

These are the most popular of all the aquarium inhabitants. First, because they are hardy and second, for beauty of color and neatness in appearance they cannot be surpassed. These fish were formerly natives of Chinese waters, but in recent years the American breeders have learned that they cannot only breed this species of a more brilliancy than the imported stock, but a fish that is acclimated as well. In fact there are no more Gold Fish imported from China. The Gold Fish that we offer are the finest specimens obtainable. With their beautiful golden-red brilliancy they not only add an ornament to any home, but they make the finest pets as well. We quote fancy stock, according to size, at only 15c, 35c, 50c, 75c, and \$1.00 each.

We offer specimens of superior shape and color at only \$1.00, \$2.00 and \$3.00 each, according to size.

Telescope Fish

This is another native of the Chinese waters, noted for their oddity, having eyes that bulge out like telescopes. The tail is single, double and sometimes triple. This variety is very scarce owing to the great demand for them to finish out the aquaria, giving it the touch that will always attract attention. We can supply you with fine specimens of these fish at 50c, 75c, \$1.00 and \$1.50 each, according to size. In color they resemble the ordinary Gold Fish.
